IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative Mr. Kipman T. Werking on 11/06/08.

2. The application has been amended as follows:

2.1 Replace claims 1-11 with the following:

1. A method for identifying one or more color calibration profiles for use with a scan of a printed image, comprising:

scanning the printed image to generate scanned image data;

performing the following steps using a computer:

determining a spatial characteristic of the printed image from the scanned image data;

comparing the spatial characteristic of the scanned printed image with spatial characteristics associated with color calibration profiles; and

selecting one or more color calibration profiles based on the comparison of the spatial characteristics, wherein

the selected one or more color calibration profiles alter a chrominance value, and

the selecting comprises executing the following decision tree:

first, distinguishing between a continuous marking process and a halftone marking process based on a degree of local variation;

second, determining whether a halftone marking process is identified and, if a halftone marking process is identified, distinguishing between an ink-jet marking process and a xerographic or offset marking process based on a degree of periodicity, and if a halftone marking process is not identified, ending the executing of the decision tree; and

third, determining if a xerographic or offset marking process is identified and, if a xerographic or an offset marking process is identified, distinguishing between a xerographic marking process and an offset marking process based on a degree of noise.

2. The method in claim 1, wherein the spatial characteristics associated with color calibration profiles are determined from scans of color calibration targets used in creating the color calibration profiles.

3. The method in claim 2, wherein the spatial characteristics associated with color calibration profiles are determined during the creation of the color calibration profiles.

4. The method in claim 3, wherein the spatial characteristics associated with color calibration profiles are stored with the color calibration profiles.

5. The method in claim 3, wherein the spatial characteristics associated with color calibration profiles are stored within private tags in the color calibration profiles.

6. The method of claim 1, wherein the comparing comprises computation of a distance measure between the spatial characteristic of the printed image and the spatial characteristics associated with color calibration profiles.

7. The method of claim 6, wherein the selecting further comprises choosing one or more color calibration profiles which are closest with respect to the distance measure.

8. The method of claim 1, wherein the determining of a spatial characteristic further comprises:

statistically analyzing the scanned image data; and
determining spatial variations in the printed image based at least on the results of the statistical analysis of the scanned image data.

9. The method of claim 1, wherein selecting one or more color calibration profiles is performed automatically.

Art Unit: 2624

10. The method of claim 1, wherein selecting one or more color calibration profiles is performed by blending multiple color calibration profiles using at least weighting factors determined from said comparison of the spatial characteristic of the printed image with the spatial characteristics associated with color calibration profiles.

11. The method of claim 1, wherein selecting one or more color calibration profiles comprises:

automatically processing a group of pre-selected color calibration profiles to generate candidate color calibration profiles; and

manually selecting one or more color calibration profiles from the candidate color calibration profiles.

2.2 Cancel claims 12-49.

Allowable Subject Matter

3. Claims 1-11 as amended are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, Applicant's arguments on page 6 of the response filed on 08/11/08 are persuasive.

Additionally, while Dunn et al. ("Extracting halftones from printed documents using texture analysis", Proc. ICIP, Vol. 1, 16-19 Sept 1996, pp. 225-228) discloses halftone extraction using texture analysis and Jaimes et al. ("Segmentation and automatic descreening of scanned documents", SPIE Vol. 3648, 1999, pp. 517-528) discloses segmenting a document into text and halftone areas by detecting the presence and frequency of screen patterns, they do not disclose, teach or fairly suggest the decision tree for distinguishing at least whether a printed image is produced using a xerographic or an offset marking process.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to YUBIN HUNG whose telephone number is (571)272-7451.
